It's not just unlike any Tiara you've ever seen.

>It's unlike any boat you've ever seen.

>On the 4300 Sovran, dramatically reduced noise and vibration allow conversations in comfort while underway. Because Volvo Penta's IPS® releases up to 25% fewer emissions, owners enjoy diesel power performance, economy and durability without exhaust smoke, noise or vibration. In fact, Volvo Penta's IPS in the Tiara 4300

Sovran delivers 25% better fuel efficiency, resulting in fewer trips to the fuel dock, increased speed and acceleration, and extended cruising range.

>The 4300 Sovran also integrates the Volvo IPS joystick control, putting unmatched low-speed maneuverability at your fingertips. With a single, subtle movement of the IPS Joystick, you command the IPS propulsion units to respond in any direction. This gives you the power to maintain control of your 4300 during tight-quarter docking, coming about, reversing or even going straight sideways &ndash all without the need for bow thrusters.

>Because IPS takes up 25% less area than traditional engines, the design team was able to employ the available space as a full second stateroom with head. Vessel sinks and shower partitions, an optional washer/dryer, a full-size refrigerator/freezer, even a spice rack and voluminous storage are a few of the options you will find. The cockpit seating is also both inviting and comfortable &ndash a perfect environment for the cruising lover.
